

Iridology

Your Eyes Truly are THE Windows
To
Gaining Knowledge & Preventative Care of Your Health

Your ONLY True Asset in Life IS YOUR Health!

What is Iridology & How is it Done?

IRIDOLOGY is a non-invasive technique to assist in finding out what is going on inside your body and can help identify the underlying cause of various symptoms.

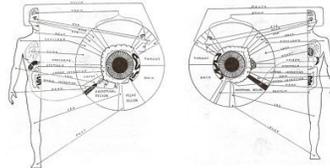

For a full **IRIDOLOGY Assessment**, an eye photo is taken and displayed on the computer screen for the trained practitioner to assess for past, present or future health problems. An analysis is then prepared within a few days. A follow up appointment is scheduled to discuss the individual's health concerns.

IRIDOLOGY does NOT diagnose disease or a medical condition and should never be used to replace a medical diagnosis. Its value is in its ability to detect genetic weakness as a preventative to potential disease. A 2nd photo can be used to see the changes in the iris as the body systems are being cleared of toxins and/or congestion.

KNOWLEDGE IS POWER: What will an Iridology Assessment Tell Me?

IRIDOLOGY Reveals Your:

- constitutional strength and weaknesses
- imbalances of the body
- your nutritional needs
- areas of toxic accumulation

Iris analysis shows changes in tissue long before clinical signs develop. The markings and colors of the iris change as changes in the body tissue occur.

What Can I do With The Information From My Assessment?

You can use this information to become a **Healthier YOU!** How?

By gaining awareness into what health issues you are genetically or environmentally predisposed to, what nutrients you are missing that can be added or replaced. Making these changes with dedication and commitment can lead to a healthier **YOU**.

Let the Healing Begin!
